Engineering Outcomes

- Resolved data collision from 30+ branches into unified pipeline
- Achieved 100% Data Reliability across all outlet records
- Automated admin processing: 12 hrs → 0.5 hrs/week
- Error rate reduced from 18% to 1%
- Full outlet tracking coverage (60% → 100%)

Business Impact

- Operational Efficiency at Scale across all branches
- 11.5 hours saved weekly on admin processing
- Real-time data availability for strategic operational planning
- Eliminated manual reconciliation bottlenecks
- Scalable framework ready for national rollout
